

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listings, of claims in the application:

- a' sub BT 1.
- (Currently Amended) A personal information system, comprising:
- a subscriber computer with an optical disk drive;
 - a portable optical disk readable by the optical disk drive;
 - a database management server comprising a database including personal data and an optical disk writer wherein the optical disk writer writes the personal data to the portable optical disk said personal data being viewable and downloadable by the subscriber computer; and
 - a subscriber interface comprising an Internet web browser wherein the Internet browser interacts with the subscriber computer so as to allow viewing of ~~is used to view~~ personal data on the portable optical disk and wherein the Internet browser interacts with the database management server so as to allow updating of ~~to update~~ the personal data stored on the database management server.
2. (Original) The system as defined in Claim 1, wherein the personal data to be stored on the portable optical disk is selectable using the subscriber interface.
3. (Original) The system as defined in Claim 1, wherein the personal data is transferred between the subscriber computer and the database management server in an HIPAA-compliant mode.
4. (Original) The system as defined in Claim 1, wherein the transfer of personal data between the subscriber computer and the database management server can be initiated by either the subscriber computer or the database management server said data transfer occurring either in a real-time mode or a batch mode.
5. (Original) The system as defined in Claim 1, wherein the personal data comprises text, image, audio, and video data.

6. (Currently Amended) A method of maintaining personal data on a portable optical disk, the method comprising:

entering personal data onto a database management server having an optical disk writer wherein the personal data is stored in the database management server in a uniformly accessible manner and wherein the personal data residing on the database management server can be updated using an Internet web browser interface;

writing the personal data onto the portable optical disk via the optical disk writer wherein the portable optical disk is readable from an optical disk drive using the an Internet web browser interface; and

delivering the portable optical disk to a subscriber.

7. (Cancelled).

8. (Currently Amended) The method as defined in Claim 67, wherein the personal data to be updated is selectable by the subscriber.

9. (Original) The method as defined in Claim 6, wherein entering, writing, and updating the personal data are in an HIPAA-compliant mode.

10. (Original) The method as defined in Claim 6, further comprising using the portable optical disk at any healthcare service center to prevent repetitious registration process at different healthcare service center sites.

11. (Original) The method as defined in Claim 6, wherein the portable optical disk is created at the health care service center site.

12. (Currently Amended) A system for maintaining personal data, the system comprising:

entering means for entering personal data;

storing means for storing the personal data in a uniformly accessible manner;

accessing means for accessing the stored personal data wherein the accessing means comprises a PC with an optical disk drive and an Internet web browser that interacts with the storing means so as to allow viewing of the stored personal data;

transferring means for transferring the stored personal data between the entering means and the storing means in a secure mode; and

updating means for updating the stored personal data wherein the updating means comprises using a database management server that interacts with the Internet web browser so as to allow updating of the stored personal data.
